00 How to use this document

This document is a **complete inventory of everything on the current Life Care website**, laid out page by page and section by section, so you can rebuild it in a premium design without missing any content. Alongside the existing content, it flags **what the client wants added, removed, or kept** (from the approved requirements brief), and notes which images belong to each page.

Legend — status tags used throughout

KEEP	exists now & stays	ADD	new, client requested	REMOVE	client wants it gone
CLIENT PROVIDES	content/asset coming later	EXCLUDED	do not build		

Two source inputs behind this inventory

- 1. The live website** — every page was crawled and its content transcribed below (Sections 2–12).
- 2. The client rules brief** — the approved requirements doc that says what to add/remove/keep. Those decisions are merged inline and summarised in Section 1 & Section 13.

Images referenced here live in the delivered **lifecare_images.zip**, organised into 8 folders (01_Home ... 08_Contact_Us).
